

COMPLETE PACKAGING LINES

DEVICE ASSEMBLY MACHINES

Services

- Custom system design & engineering
- Line integration & commissioning
- Training & technical support
- Preventive maintenance & service programs
- Spare parts supply
- Remote support & troubleshooting

Fariba Pack operates a dedicated office in **New Jersey**, providing local service and support across North America, Canada and Puerto Rico. Their United States based team includes several experienced technicians and engineers, ensuring prompt on-site assistance, rapid response times, and personalized service to meet customer needs.

ACIC Equipment USA is proud to partner with **Fariba Pack**, a leader in advanced packaging machinery who brings world-class equipment and expertise to clients across North America.

Fariba Pack is at the forefront of advanced packaging machinery, delivering tailored solutions for regulated industries. Formed through the strategic partnership of two prestigious Italian manufacturers, **Farmo Res** and **Cariba**, **Fariba Pack** combines **over 100 years** of engineering excellence and innovation.

Product Portfolio & Capabilities

Fariba Pack specializes in custom automation solutions that streamline packaging operations and boost efficiency. Their technologies include robotic pick-and-place systems, syringe handling units, and vision inspection. A partnership with **SiplAutomation** further enhances their capabilities. Together, they deliver turnkey solutions for device assembly and packaging.

Ver-06/25

THERMO-FORMING MACHINES

Deep-draw thermoformers offer precise, sustainable packaging for syringes, vials, unit doses, and medical devices.

Suppository Machines, The Farmo Due suppository machines deliver high-output production with servo-driven control and integrated cooling, ensuring consistent quality and efficiency.

AUTOMATION, SECONDARY PACKAGING, & END-OFFLINE

Top-Load and Side-Load Cartoners: Flexible, user-friendly cartoning systems designed to handle various product types and packaging formats efficiently.

End-of-Line Machinery: Bundlers, case packers, and palletizers with serialization and aggregation, designed to optimize final packaging stages and ensure product traceability.

Tray-Forming & Closing: Durable machines for forming and closing trays and cartons, compatible with paperboard and lightweight corrugate.

Fully Integrated Lines with Serialization and Aggregation: Turnkey packaging lines covering the entire process with built-in serialization and aggregation features, tailored for seamless integration, compliance, and high performance.
